## Environmental Management Policy

Fresco Systems Specialize in the design & manufacture of Bulk Material Handling Equipment, with an aim to be the world's first choice for advanced, commercially viable, automated bulk material handling and process systems. Our goal is to provide unique, innovative, Bulk Material Handling solutions to our customers.

Fresco Systems as a company has made a commitment at all levels to operate in a socially responsible manner in regards to our activities, our staff and the products we produce.

Fresco Systems recognise that sustainable business practices are fundamental to our future. We strive to identify & minimise the environmental impact of our daily business operations, with an aim for continuous improvement.

We will:

- Comply with, and exceed where practical, all relevant environmental legislation
- Consider environmental impact in all aspects of our business operations
- Actively promote recycling within the business
- Reduce consumption of natural resources by efficient use of water, energy and other natural resources
- Provide training for our employees to ensure they are aware of our environmental policies & objectives
- Promote a system of continuous improvement, by monitoring and reviewing objectives & targets, including at least the annual review of policies and procedures.

Through this we will together build a company, that all stakeholders can take pride in being associated with, recognising our long term commitment to total sustainability in our global marketplace.

This policy has been developed, and is supported by top management.
